BUDGET 2021

BUDGET MATHS

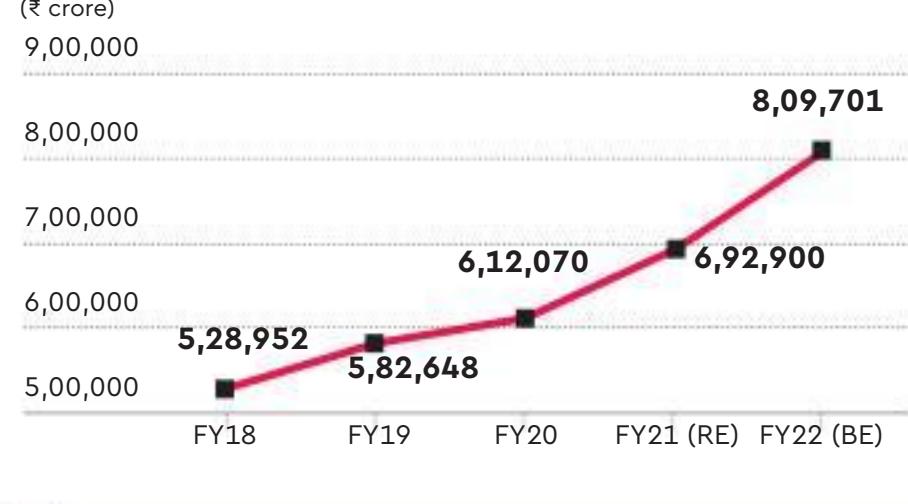

Drastic rise in revenues

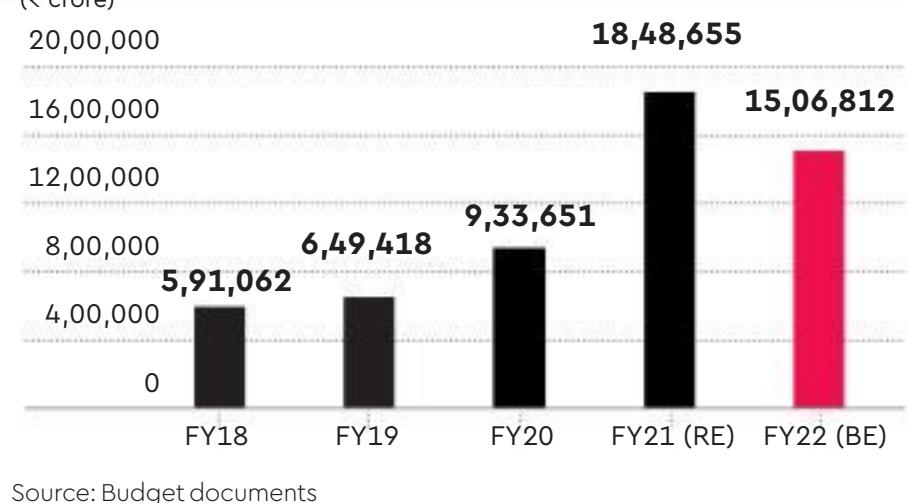

But only a slight increase in expenditure

However, interest payments will rise too

But there will be a sharp fall in fiscal deficit

Source: Budget documents

Budget 2021-22 Scores High on Our Expectations!

"The new budget gives immense hope of revitalising our ailing economy stricken by the gloom and doom situation created by the pandemic. The Budget 2021-22 has opened up new investment avenues for different sectors and is focussed on creating more jobs in the market whilst creating several infrastructure projects", says **Ashok Singh Jaunapuria**, Managing Director & Chief Executive Officer, SS Group.

How will the Real Estate sector shape up in 2021 post this budget?

From yesterday's budget speech, it is heartening to see that the government considers Real Estate sector as an integral part of the Indian economy. In the pre-COVID-19 days, the Real Estate sector was already going through a rough patch, with dwindling consumption, lacklustre investment appetite and the slowdown in the market. Back then, the commercial office segment flourished and remained the top-ranking real estate asset class, whilst residential sector continued to struggle under the funding crunch and slow annual sales growth.

However, this trend took a U-turn in 2020, once the pandemic struck India. According to the recently released Economic Survey report, the pandemic affected the residential property market during the April-June period last year but sales have improved in affordable homes segment since July onwards, reflecting economic recovery in the Real Estate sector. Budget 2021-22 seems to echo the same sentiments, with the government pushing for growth in the affordable housing sector. In the new budget, the Union Finance Minister decided to extend the deductions on affordable housing by one year to FY22. Tax exemptions were also notified for the rental housing projects. Besides, the government said it is committed to provide affordable rental housing for migrant workers.

As per the latest figures, affordable housing already accounts for more than 35 per cent of the supply across the top seven cities in the country. Therefore, the extension of the tax holiday announced for affordable housing projects for one more year will help bring in more new supply within this segment. This extended time limit for affordable housing projects deduction and additional interest on loans borrowed for affordable housing will compensate the time lost due to the pandemic.

Similarly, the government's increased focus on infrastructure growth and capital expenditure will impact the overall growth of the Real Estate sector, too. With the opening of new infrastructure such as transit corridors, highways and newly-proposed airports, the Real Estate sector will definitely get a new lease of life. All these factors taken together will keep the demand for affordable housing buoyant in 2021 as well.

What does the Budget 2021-22 indicate overall?

With the Budget 2021-22, the idea is to create more jobs in the market to curb the growing unemployment rate in the country. Through this budget, the government is planning to create a new ecosystem wherein investors can come and invest in the market to create more employment opportunities for the youth. For example, look at the boost provided to the infrastructure sector and think of the millions of people the investing companies would employ to develop projects such as – metro rails across various cities, highways, airports, transit cor-

Centre shows financial honesty in times of crisis

For 2nd yr in row, tax devolution to states declined – by 15% in FY20, 15.5% in FY21

KG Narendranath

THE CENTRE HAS chosen to be more honest with its finances, when it looked the grimmest. If it hadn't transferred the liability of over ₹3 lakh crore arising out of the NSSF loan for the Food Corporation of India (FCI) on to the Budget, the fiscal deficit in FY21 would have been 8% of GDP, instead of 9.5% announced.

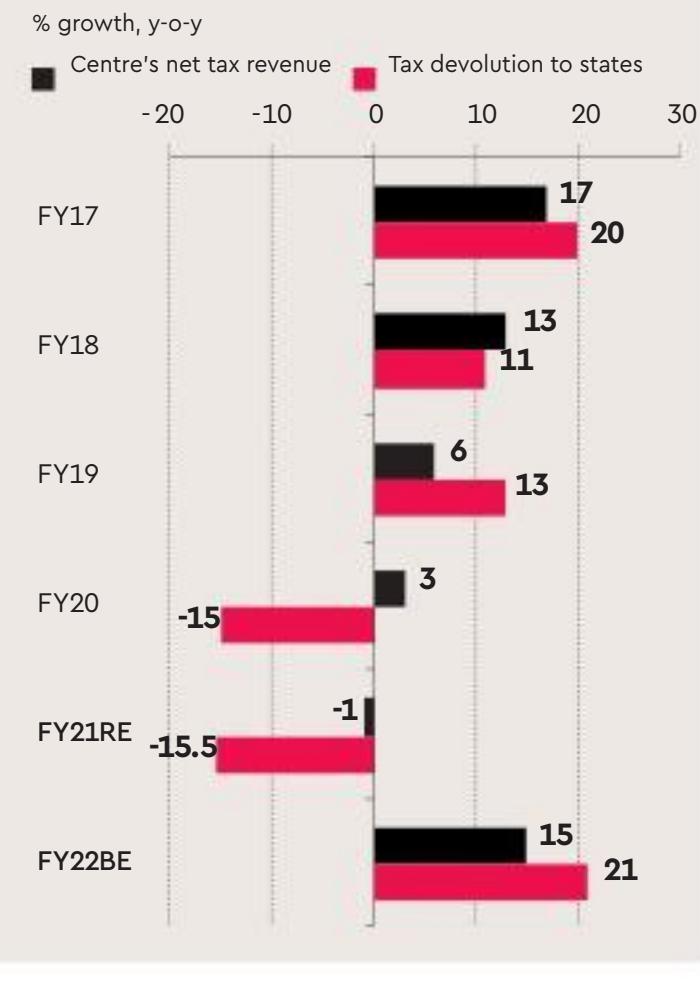

While projecting a fiscal deficit of 6.8% for FY22 even with flat growth in Budget size, the government tacitly admitted that 3% fiscal deficit, as mandated under the FRBM road map, is a very demanding – if not unsustainable – target in the Indian context. This goal has been missed on more occasions than it was met. Even in the new glide path laid out, the deficit is seen to be 4.5% in FY26.

The Economic Survey 2020-21 advised the government to be "more relaxed about debt and fiscal spending", and even argued for a rethink on the established fiscal consolidation policy. The survey cited that interest on debt paid by the Government of India has often been less than the rate at which the country's economy expanded.

The gravity of the fiscal situation, however, will be evident with the rising share of revenue deficit (RD) in the fiscal deficit (FD). The RD, which is supposed to be eliminated, was 71% of FD in FY20, but rose to 79% in FY21 and is projected to be 76% in FY22.

Two years of highly elevated fiscal deficits are reflecting on interest payments, which are projected to rise from ₹6.12 lakh crore in FY20 to ₹8.1 lakh crore in FY22.

The tax revenue projections for FY22 are not unduly optimistic either. Growth of 16.7% in gross tax receipts, upon nominal GDP growth of 11.4% demands a buoyancy of 1.2. That, on the face of it, needs a sudden, dramatic turn around from negative buoyancy rates of FY20-FY21. However, given the steady and steep rise in GST collections – thanks

The gravity of the fiscal situation, however, will be evident with the rising share of revenue deficit in the fiscal deficit

partly to the use of data analytics to improve compliance – robust excise mop-up, and the likely pick-up in corporate profits (corporate tax collections are seen growing 23% on year), the seemingly ambitious target may be within reach.

It may be noted that the (central) tax-GDP ratio, which dipped 9.9% in FY20 from 11% in the previous year, is projected to be roughly at the same level in both FY21 and FY22. What came to the government's aid in FY21 was a

surge in excise collections (up ₹94,000 crore or 26% over Budget estimate) in FY21.

While the Budget size grew by a sharp 28% in FY21 to cater to the needs of the pandemic-hit economy and gave succour to the vulnerable sections of the population, flat growth is projected in FY22.

This is even as the budgetary capital expenditure is projected to increase 26% to ₹5.54 lakh crore. The revenue expenditure is being sought to be curbed, with the allocations for even popular schemes like MG-NREGA being regulated (₹73,000 crore in FY22 against ₹1.1 lakh crore in FY21).

Apartment point is that the states are bearing the brunt of the dip in tax revenue, more than the Centre. For the second year in a row, tax devolution to the states declined – by 15% in FY20 and 15.5% in FY21. The aggressive use of the cess route by the Centre to tax auto fuels has allowed it to enhance the non-shareable tax pool.

The shifting of liabilities on account of the NSSF loan for FCI to the Budget is a sign that the government wants the grain procurement operations to be unhampered. It will also help reduce the economic cost of grains and the actual food subsidy outgo, as FCI will save the interest it pays on its borrowings from banks and NSSF.

The Centre had budgeted to borrow ₹7.80 lakh crore in 2020-21 but was forced to raise it by as much as 54% in May last year to ₹12 lakh crore.

However, the Centre has now announced that it will borrow ₹80,000 crore more in February and March, taking the full-year market borrowing to a record ₹12.8 lakh crore. At 6.8%, the Centre's fiscal deficit target for the next fiscal exceeded the forecasts of 5-5.5% of GDP. G-secs issuance next year is placed at ₹9.7 lakh crore, a quantum enough to put upward pressure on yields, along with the state development loans to be raised by states.

Tax devolution unchanged at 41% for FY22-FY26

PRASANTA SAHU

THE 15TH FINANCE Commission has retained states' aggregate share in the central taxpool for FY22-FY26 at 41% and has suggested the creation of a dedicated ₹2.38-lakh crore non-lapsable fund for defence and national security.

As in FY21, 41% of the divisible segment of central taxes will go to all states/UTs, except J&K and Ladakh, and an additional 1% to the latter two in the next five years till FY26. This is against a 42% share for all states, including the then J&K, during the 14th Finance Commission (FY16-FY20). The Commission has also retained the weights assigned to various parameters for FY22-FY26 as was recommended for FY21.

It suggested that the Centre may constitute a Modernisation Fund for Defence and Internal Security (MFDIS) by garnering resources from the Consolidated Fund of India (CFI), disinvestment proceeds of defence PSUs, proceeds from the monetisation of surplus defence land and proceeds of receipts from defence land likely to be transferred to state governments and for public projects in future. Transfers from CFI, as feared by some state governments, might reduce the divisible pool to some extent.

The government tabled the Commission's final report for five years through FY26 along with the action taken report in the Parliament on Monday. Its report for FY21 is already under implementation.

In the Commission's assessment, gross tax revenues for the FY22-FY26 period are expected to be ₹135.2 lakh crore, of which divisible pool (after deducting cess and surcharges & cost of collection) is estimated to be ₹103 lakh crore.

ADVERTORIAL

ridors etc. Also, the government didn't introduce any new taxes, which brings a huge respite to people working in different sectors. The government has also assured to simplify the process of filing GST returns, as there were concerns regarding this as well.

How is your company doing nowadays? What all projects have you delivered in the past?

Established in 1992, SS Group is a well-trusted brand in the market with a strong presence in the Real Estate development.
